

Alcalá de Henares, May 10, 2011

Dear Friends:

Another year, the General Foundation of the University of Alcalá announces the International Graphic Humor Exhibition, through its Program of Graphic Humor. This year we reached the eighteenth edition.

As usual, the exhibition shows various topical issues and of great social significance. On this occasion, is dedicated to food. The problems arising from it are many and varied. From the abundance of food resources, which can cause disorders such as anorexia, bulimia or obesity, to the lack thereof, causing the big global problem, the hunger, which is one of the Millennium Goals the UN wants to remedy.

To facilitate the best work, on the website of the Exhibition (<http://www.humorgrafico.org/muestras/muestra-xviii>) is the call in English, French, Portuguese, Chinese, Russian and Arabic besides Spanish. On this page you can download documentation on the topic, and all information related to this event.

We understand that Graphic Humor is a great means of communication and awareness, and these problems must involve all of society. Therefore, we request your participation in the call by sending work. The deadline for receipt of the same ends on June 30, 2011.

We remind you that it can be a cartoon, a strip or a cartoon on the topic of Food (from the lack to the abundance).

Sincerely,

Graphic Humor Program
General Foundation of the University of Alcalá
